Abstract

Abstract goes here. The idea of the abstract is to provide a high-level pitch, or summary, of the project. Every single IISc student should be able to understand most of it. Remember you can not add all the details here. You have to be succinct, willing to sacrifice the details.

1 Introduction

Section for introduction.

2 Related Work

Cite broadly and generously. Focus on ideas and not people. So instead of saying, [Pruthi et al. \(2019\)](#) did X. Discuss X, and then add a citation towards the end ([Pruthi et al., 2019](#)).

3 Action Plan

Please be as clear and concrete as possible. Mention the timelines and division of work among team members.

Author Contributions

If the project is a group project, please list the detailed contributions of each author. This section does not count towards the page limit.

Declaration about AI Assistance

Authors are required to declare if they used AI assistance in the project. Ultimately *students should take full responsibility for the contents of their projects*. Consequently, any falsehood, instance of plagiarism, or misrepresentation produced by an LLM would be considered an instance of academic misconduct and result in an F grade for that component of the project. This disclosure section also does not count towards the page limit. Below, we include a boiler-plate template for disclosing AI use, which you could optionally use.

In this work, we used generative AI tools for [tasks with required disclosure]. We have not used generative AI tools for [other tasks with required disclosure], and [the rest of the required disclosure tasks] are not applicable to this work. Additionally, we used generative AI tools for [tasks with recommended disclosure]. We have reviewed all AI-assisted work. [Elaborate. For example, "we checked LLM-generated research ideas for potential plagiarism through a manual literature survey", "LLM-generated code was verified and tested for correctness by 2 authors", etc.]. We take responsibility for the final content of this work, including text, claims or artifacts produced with the aid of generative AI.

A Appendix

You may include other additional sections here. These don't count towards the page limit, but readers, or evaluators, of your report are not obligated to read it. Therefore, if you think these details are necessary to assess the quality of your work, then you should include them in the main report.
